Response to Amendment

The following is in response to the amendment filed on February 14, 2008

Allowable Subject Matter

Claims 16, 18-20, 23, 24, and 26-37 are allowed.

The following is an examiner's statement of reasons for allowance:

In the press felts of the claimed types, the prior art does not disclose or suggest a base fabric having at least one component with overlapping edge areas comprising:

- a) at least one thinned joining edge area, with the density of transverse yarns smaller than in other portions of the component;
- b) a permeability corresponding to that of the rest of the component;
- c) pressed joining edge areas, with a thickness corresponding to that of the rest of the component.

All claims encompass at least this combination of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed February 14, 2008 have been fully considered. Reference is made to the Interview with Applicant on January 29, 2008.

In view of the arguments, Applicant has overcome the rejection set forth previously under 35 U.S.C. 103(a) over Hyvonen (WO 02/053833) in view of Weatherly et al (US 4,501,782), Rexfelt (US 5,360,656), and Collette (US 5,713,399). Hyvonen represents the closest prior art, disclosing a press felt with an abutting seam. Although the supporting references disclose overlapping seams, it is recognized that none teach an overlapping seam constructed with at least the above claimed combination of features of smaller transverse yarn density, matching permeability, and matching thickness in the adjoining areas.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Hug whose telephone number is (571) 272-1192.
